Repair and Modification of PT Concrete Structures

An overview of the repair and modification of post-tensioned concrete structures will be presented. A brief history of post-tensioning systems will be reviewed, as well as typical approaches to evaluating and repairing post-tensioning tendons. Four case studies will be discussed to demonstrate common repair techniques for button head systems, monostrand systems, strengthening using external PT, modification of existing PT structures, and examples of problems that may be encountered during new construction.

The ACI NE Ohio Chapter invites you to join us on **February 21, 2019** in welcoming Ms. Tracy Naso.

Ms. Naso is an Associate Principal at Wiss, Janney, Elstner Associates, Inc., in Northbrook, Illinois, where she has 14 years of experience with the investigation, repair, and strengthening of existing structures. Her expertise is the evaluation, repair, strengthening, and protection of reinforced concrete, including post-tensioned and precast/prestressed systems. Ms. Naso is a member of ACI, ASCE, the Structural Engineers Association, and the Post-Tensioning Institute. For PTI, she is the chair of the Repair, Rehabilitation, and Strengthening Committee. She is also a member of the Field Personnel Certification Committee where she is active on the Task Group for Unbonded PT-Repair, Rehabilitation and Strengthening Personnel Certification.

There will be 1.0 Continuing Professional Development hour (CPD) offered for this presentation.

The cost includes 2 drink tickets (beer/wine), buffet dinner and presentation.
